NATIONAL LIBRARY OF MEDICINE

What is PubMed Central?

آرشیو دیجیتال کتابخانه ملی پزشکی آمریکا

از سال ۲۰۰۰ میلادی ایجاد شد.

محیطی رایگان برای دسترسی به متن کامل مقالات انگلیسی زبان

- > 2.9 million articles (Dec 2013)
- 70,000 manuscripts per year
- PubMed Central, PubMed, and related NLM services:
 - 1,300 hits per Sec.

✓ اصل اولیه: دسترسی رایگان و آزاد به مقالات علمی

<http://www.pubmedcentral.nih.gov>

تفاوت بين PubMed و PMC

PubMed is a **database of citations and abstracts** for millions of articles from >5000 journals.

- It includes links to full-text articles at several thousand journal web sites as well as to most of the articles in PubMed Central.

PubMed Central (PMC) is an **electronic archive of full-text journal articles**, **offering free access** to its contents.

- PMC contains nearly 2 million articles, most of which have a corresponding entry in PubMed.

دومین راه: چگونه به این آرشیو دسترسی یابیم؟

از طریق پایگاه PubMed

The screenshot shows the NCBI PubMed website interface. At the top, there is a navigation bar with 'NCBI Resources' and 'How To'. Below this, the 'PubMed.gov' logo and 'US National Library of Medicine National Institutes of Health' are visible. A dropdown menu is open, listing various resources. The 'PMC' option is highlighted in blue and circled in red. A red arrow points from the text 'از طریق پایگاه PubMed' to this highlighted option. The main content area features a search bar, a 'Advanced' search option, and a large text block stating 'comprises more than 23 million citations for biomedical...'. Below this, there are sections for 'Using PubMed' and 'PubMed Tools', each with several links.

سومین راه: چگونه به این آرشیو دسترسی یابیم؟

Review: 0

1: [J Exp Anal Behav](#). 2006 Sep;86(2):211-22.

Choice between single and multiple reinforcers in concurrent-chains schedules.

Mazur JE.

Psychology Department, Southern Connecticut State University, New Haven 06515, USA. mazurj1@southernct.edu

Pigeons responded on concurrent-chains schedules with equal variable-interval schedules as initial links. One terminal link delivered a single reinforcer after a fixed delay, and the other terminal link delivered either three or five reinforcers, each preceded by a fixed delay. Some conditions included a postreinforcer delay after the single reinforcer to equate the total durations of the two terminal links, but other conditions did not include such a postreinforcer delay. With short initial links, preference for the single-reinforcer alternative decreased when a

Correction

AGRICULTURAL SCIENCES. For the article “Genetic analysis of traditional and evolved Basmati and non-Basmati rice varieties by using fluorescence-based ISSR-PCR and SSR markers,” by J. Nagaraju, M. Kathirvel, R. Ramesh Kumar, E. A. Siddiq, and Seyed E. Hasnain, which appeared in number 9, April 30, 2002, of *Proc. Natl. Acad. Sci. USA* (99, 5836–5841; First Published April 16, 2002; 10.1073/pnas.042099099), Fig. 3 appeared incorrectly. The label Karnal in *a* and *b* should read Super. The corrected figure and its legend appear below.

Figures and Tables

Figure 3. Dendrograms derived from an unweighted pair group method analysis (UPGMA) cluster analysis by using Nei and Li Coefficients based on (a) ISSR markers and (b) SSR markers.

Articles

The PubReader view is Designed particularly for enhancing readability on tablet and other small screen devices

PubReader can also be used on desktops and laptops and from multiple web browsers.

Read more productively

This view is available for :
any article that is available in full-text HTML form in PMC.

It is not available for :
older content & in only PDF form or scanned images of the original print pages.

PubReader view tools

The screenshot shows a PubReader article page. At the top, there is a header with the PMC logo, navigation icons, and the article title: "The prevalence of hepatitis B antigen-positivity in the general population of Mashhad, Iran". Below the title, the authors are listed: "Farhad Fathimoghaddam, Mohammad Reza Hedayati-Moghaddam, [...], and Hamid Reza Sima". The main content area is divided into sections: "Objectives", "Patients and Method", and "Results". A "Done" button is visible in the top right corner of the article content area.

Article Navigation

The article navigation menu is a vertical list of options that appears when the "Done" button is clicked. It includes a "Done" button at the top, followed by the title "Article navigation". The menu items are: "Abstract" (highlighted in yellow), "Background", "Objectives", "Materials and Methods", "Results", "Discussion", "Acknowledgments", "Footnotes", "Article information", and "References".

Find

The browser address bar shows the URL: "www.ncbi.nlm.nih.gov/pmc/articles/PMC3212777/?report=reader". Below the address bar, there is a search bar with the placeholder text "search this page" and a magnifying glass icon. An orange arrow points from the "Find" text to the search bar.

[Additional article information](#)

Abstract

Background

Hepatitis B virus (HBV) infection is a significant health problem throughout the world.

Objectives

We aimed to evaluate the prevalence of hepatitis B surface antigen (HBsAg) seropositivity in the general population of Mashhad, northeast of Iran.

Patients and Method

One thousand six hundred and thirty (1630) subjects aged 1 to 90 (Mean; 29.1 ± 11.5) living in Mashhad were selected randomly for the study. Informed consent and medical histories were obtained from all participants. Blood samples were considered HBsAg positive if they were positive on enzyme-linked immunosorbent assay (ELISA) and logistic regression was used to determine factors related to HBsAg positivity using SPSS 16.0.
